## North Battleford revamps City Website <http://www.cityofnb.ca>

The City of North Battleford launched a redesigned and upgraded version of the City website <http://www.cityofnb.ca> from the 2013 version.

The site now offers an emphasis on ease of access with search functionality centered on the home page. Additionally, the landing page now highlights the most popular web services. This includes a comprehensive Calendar that lets residents know about upcoming City sponsored events and services, F.A.Q.'s (Frequently Asked Questions) on several subjects of common inquiry to City Hall, Career opportunities at the City and City Contact information.

Additionally, the revamped site features better organized menus for users looking for more specific content. Now, when browsing sections of our site such as Recreation & Attractions or City Government users will have clear drop-down menus that aim to make information clear and accessible to both desktop and mobile phone users.

City Manager Jim Puffalt says: "We are excited to provide an updated website that is the standard for 2018, fully functional with both mobile and desktop users as well as a powerful search option. There are also ample opportunities for customers through the FAQ's to be able to self-direct inquiries and obtain information about services at any time."
